PHMSA requests comments on the following information collection:

*Title:* Hazardous Materials Shipping Papers & Emergency Response Information

*OMB Control Number:* 2137-0034

*Summary:* This information collection is for the requirement to provide a shipping paper and emergency response information with shipments of hazardous materials. Shipping papers are a basic communication tool in the transportation of hazardous materials and, by definition (*see* 49 CFR 171.8), include a shipping order, bill of lading, manifest, or other shipping document serving a similar purpose and containing the information required by §§ 172.202, 172.203, and 172.204 of the HMR. A shipping paper with emergency response information must accompany most hazardous materials shipments and be readily available at all times during transportation.

Shipping papers serve as the principal source of information regarding the presence of hazardous materials, identification, quantity, and emergency response procedures. They inform on compliance with other requirements (i.e., the placement of rail cars containing different hazardous materials in trains); prevent the loading of poisons with foodstuffs; maintain the separation of incompatible hazardous materials; and limit the amount of radioactive materials that may be transported in a vehicle or aircraft. Shipping papers and emergency response information also notify transport workers that hazardous materials are present and serve as a principal means of identifying hazardous materials during

transportation emergencies. Firefighters, police, and other emergency response personnel are trained to obtain the DOT shipping papers and emergency response information when responding to hazardous materials transportation emergencies. The availability of accurate information concerning hazardous materials being transported significantly improves response efforts in these types of emergencies.

*Affected Public:* Shippers and carriers of hazardous materials in commerce.

*Annual Reporting and Recordkeeping Burden:*

Number of Respondents:	260,000
Total Annual Responses:	175,234,493
Total Annual Burden Hours:	4,598,685
Frequency of Collection:	On occasion

Issued in Washington, DC on February 13, 2018.
